

Attention all food start-ups!

Need to accelerate your food start-up to a higher level?

Growing Food is an acceleration programme offering knowledge-intensive boot camps with specialist scientists, tailor-made mentor schemes and business experts attached. The programme aims to help you grow your start-up by combining food and food-tech knowledge from three universities (University of Copenhagen, Aalborg University and Technical University of Denmark) with start-up specialists from the investment company CAPNOVA.

Interested? The application period is from June to end September. Specific dates coming soon on www.growingfood.dk.

Applicants selected for the programme will get:

- A three-day boot camp: Focus on extensive business model development and sparring with high level scientists and researchers from the three universities.
- Thematic two-day boot camp: Specific food and food-tech knowledge to strengthen your business model.
- Mentor programme: Participants are partnered with a mentor with science or business competences.
- Access to special advisors: Participants will get the opportunity to collaborate with special advisors.
- Pitch event: Selected start-ups qualify for a unique pitch event with the participation of early stage investors and potential industry partners.

Who can apply? Growing Food encourages all food start-ups to apply – students, Ph.D.'s and anyone at an early business stage. We are looking for innovative knowledge intensive start-ups within food and food tech or related areas. The programme focuses on start-ups from the Greater Copenhagen area.

About us: Growing Food CPH is a start-up acceleration programme initiated jointly by start-up investor and developer CAPNOVA A/S, University of Copenhagen (KU), Aalborg University (AAU) and Technical University of Denmark (DTU).
